Built up areas with less green space get hotter

Heat hazard scores in Brent, London

Note: The higher your heat hazard score, the more likely it is that your area will experience high temperatures during hot weather, compared with other areas in your neighbourhood. A score of one means the postcode was in the lowest 40% of areas, while a score of five means it was in the top 1%.

The neighbourhood (left) is a four on the heat scale created by 4EI. One day last July it was 5C hotter than a nearby neighbourhood (right)

Out of Bounds Equity in Access to Urban Nature

An overview of the evidence and what it means for the parks, green and blue spaces in our towns and cities

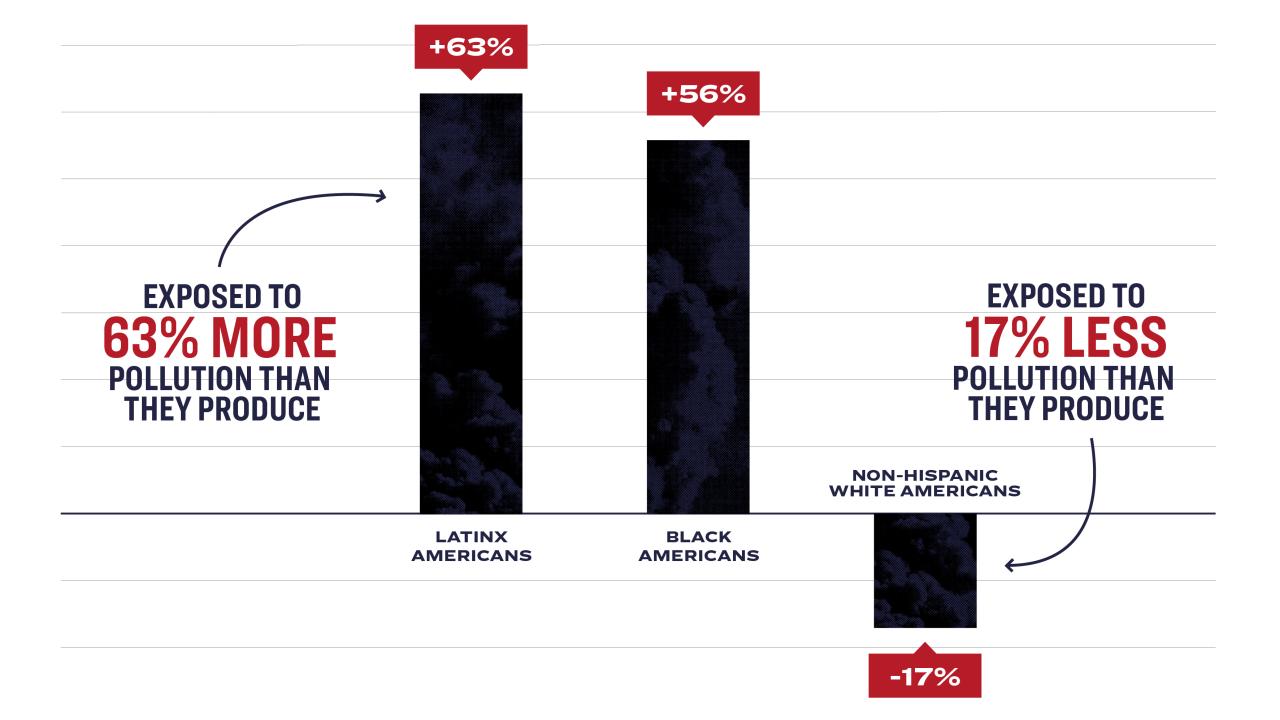

1 in 8 households has no access to a private or shared garden

People on low incomes are less likely to live within a 5 minute walk of a green space

Almost 40% of people from ethnic minority backgrounds live in the most greenspace deprived areas, compared to 14% of White people

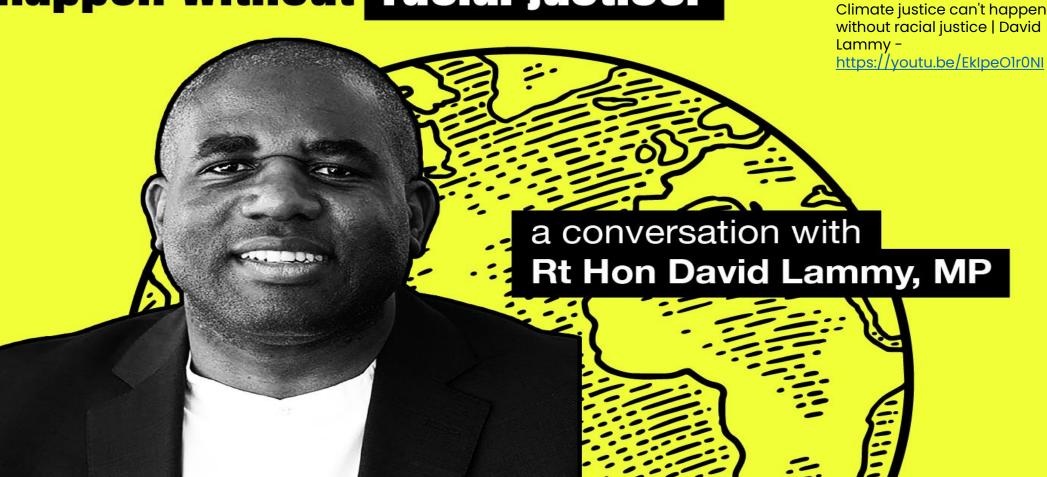

People with a long-term health condition or disability are much less likely to access public greenspace

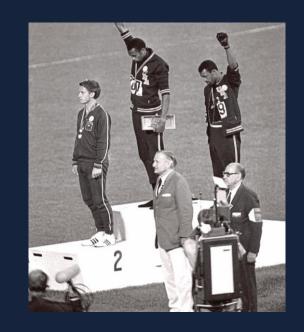

WHY CLIMATE JUSTICE

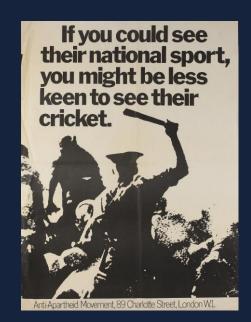

can't happen without racial justice.

On a climate justice journey

Understand the agenda

Connecting climate justice to what we do

Our place in the protest

All voices are heard

Enthusiasm and excitement

A 2050 vision for the sector

Active design

- Walking, cycling and low-emission travel through nature-rich corridors is the norm.
- Physical activity and sustainability principles underpin the design of our community spaces.

Zero carbon and climate resilience

- Sports facilities generate renewable energy for the local community and showcase circular and sustainable build methods.
- Facilities and sports are adapted to our changing climate (e.g. flood resistant).

Nature thriving

- Everyone has access to clean green and blue spaces to enjoy, play and relax in.
- These spaces are biodiversity and wildlife-rich.

Community hubs

- Sports facilities and events are community orientated and co-located with health and other essential services.
- Clubs regenerate and transform local communities through sustainable and inclusive practices.

In our every deliberation, we must consider the impact of our decisions on the next seven generations.
